

EVIDENCE

Rosen Litigation Technology Consulting

Evidence™ by RLTC is a legal presentation assistant that allows the user to quickly display documents, pictures, and other digital files on an external display. Unlike other presentation software Evidence™ is a presentation tool allowing for immediate display of important information to respond, counter, or reinforce a point.

Evidence™ is designed with legal professionals in mind using a standard 1024x768 resolution and supporting native iOS file formats.

TECHNICAL SPECIFICATIONS:

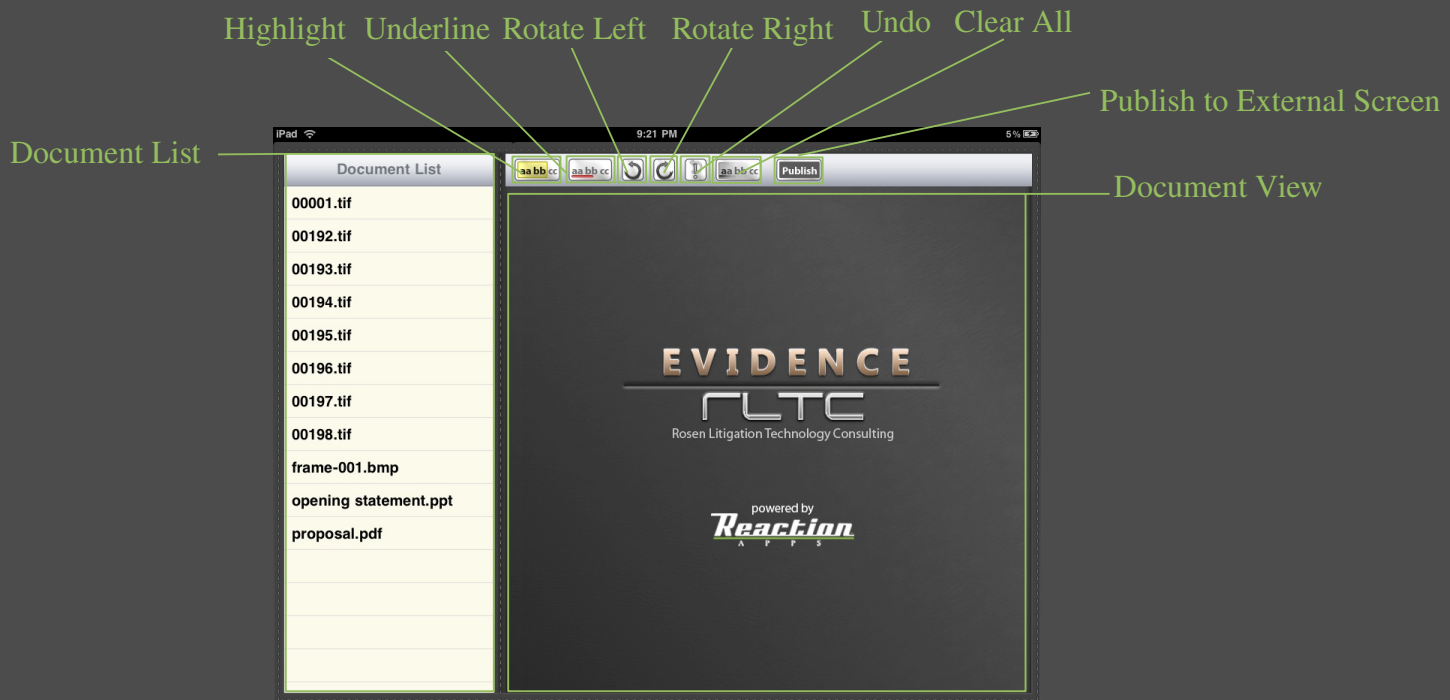

RESOLUTION: 1024x768

GESTURES: PAN FOR MOVING AROUND IN A DOCUMENT. PINCH FOR ZOOMING IN OR OUT OF A DOCUMENT.

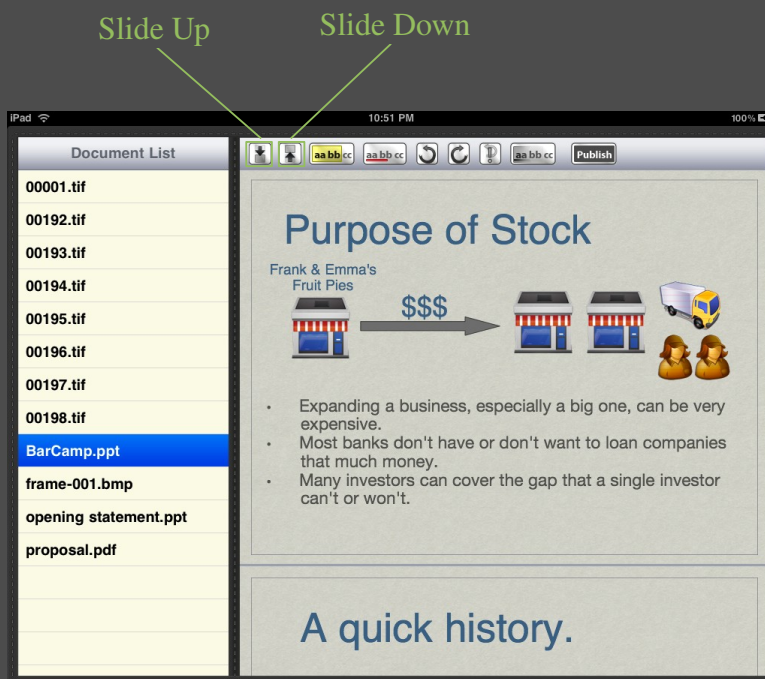

SUPPORTED DOCUMENT & IMAGE FILE TYPES:

xls, key.zip, numbers.zip, pages.zip, pdf, ppt, doc, rtf, rtf.zip, key, numbers, pages, tiff, tif, jpg, jpeg, gif, png, bmp, bmpf, xbm;

FUNCTIONS (NORMAL FUNCTIONS)

There are two modes. The default mode is to adjust the document's position and size. The markup mode is active after tapping the Highlight or Underline buttons and remains active until the button is tapped again. The slide buttons only appear on PowerPoint presentations. They provide single tap forward and backward slide flipping. Pressing Publish while the slide buttons are active will present a single slide on the external screen. Panning or resizing the document will cause the slide buttons to disappear as the intention is a different perspective of the document.

Evidence™ uses iTunes file sharing to sync documents from the computer to the iPad. Click the add button and select any of the supported file formats to load into Evidence™. After syncing start Evidence™ and it will take note of the changes in the Document List.

Rosen Litigation Technology Consulting applies proven methodology and cutting-edge technology to organize and present exhibits, information, and multimedia at trial.

Our services range from low cost graphic solutions such as traditional foam-core boards, to large scale document databases and digital presentation tools to organize and present evidence in document intensive cases. Rosen LTC services ensure that your audience recognizes that you make a concerted effort to be clear, organized and efficient at trial.

Reaction Apps LLC provides mobile application development, consulting, and services for third parties. Mobile applications are a great business tool for employees and customers. To learn more please contact us or visit our website.
